Reviewing Emotional Intelligence With Leadership Theory: A Study of the Role of Emotional Intelligence on Transformational Leadership

Shubhangini Rathore
IBS Business School, India

Rina Pandey
Amity Global Business School, India

ABSTRACT

Leadership theories hold a pertinent place in the effective management of people. In the Contemporary scenario, business leaders and managers have a huge onus on themselves of driving a workforce thriving with diverse Human Resource Management challenges. Interest in the role Emotional Intelligence in the workplace has increased in recent years, with greater emphasis on the benefits of understanding and utilizing emotions for managing people at work. In the contemporary scenario, the role of emotional intelligence competencies as predictors of leadership is being researched in order to leverage this information for increased leader effectiveness and performance. The present study identifies the congruence between various aspects of emotional intelligence and essential leadership competencies. It also identifies

Research Study on Climate Change Education for Sustainable Development in Mongolia

INTRODUCTION

Education is critical for promoting sustainable development and improving the capacity of the people to address environmental and developmental (UN, 1992). From the time sustainable development was first endorsed at the UN General Assembly in 1987, the parallel concept of education to support sustainable development has also been explored. From 1987 to 1992, the concept of sustainable development matured as committees discussed, negotiated, and wrote the 40 chapters of Agenda 21. Initial thoughts concerning Education for Sustainable development were captured in chapter 36 of Agenda 21, "Promoting Education, Public Awareness, and Training" (McKeown, Hopkins, Rizi, & Chrystalbridge, 2002). Obviously, education is an essential tool for achieving sustainability. People around the world recognize that current economic development trends are not sustainable and that public awareness, education and training are essential to move society toward sustainability (Hopkins & McKeown, 2002).

Climate change impacts on the natural environments and the livelihood of the people in Mongolia, obviously. The study of climate change, began in 1979 in Mongolia, after the second World Meteorological Conference. "Climate change" was the first symposium, organized by the Institute of Meteorology and Hydrology in June, 1980 (Dagvadorj, Natsagadorj, Dorjpurev, & Namkhainyam, 2009). Sustainable development, however, has been discussed in Mongolia since 1992 while the issue of education for
